# 9000 SERIES DRILL

## **SIMPLY THE PERFECT PACKAGE FOR SUPERIOR SEEDING THE NEW 9000 SERIES DRILL**

The new Connor Shea 9000 Series Drill packages recent advancements with the core features and elegant simplicity of the classic CSN 8000 Series machines.

Coil tynes give predictable performance and take the hard work out of maintenance. The included coulter bar and trailing hitch kit make short work of tough conditions.

No power? No problem! The 9000 Series comes as standard with our time-proven, infinitely variable speed, oil bath gearbox. Of course, electric drive is also an option.

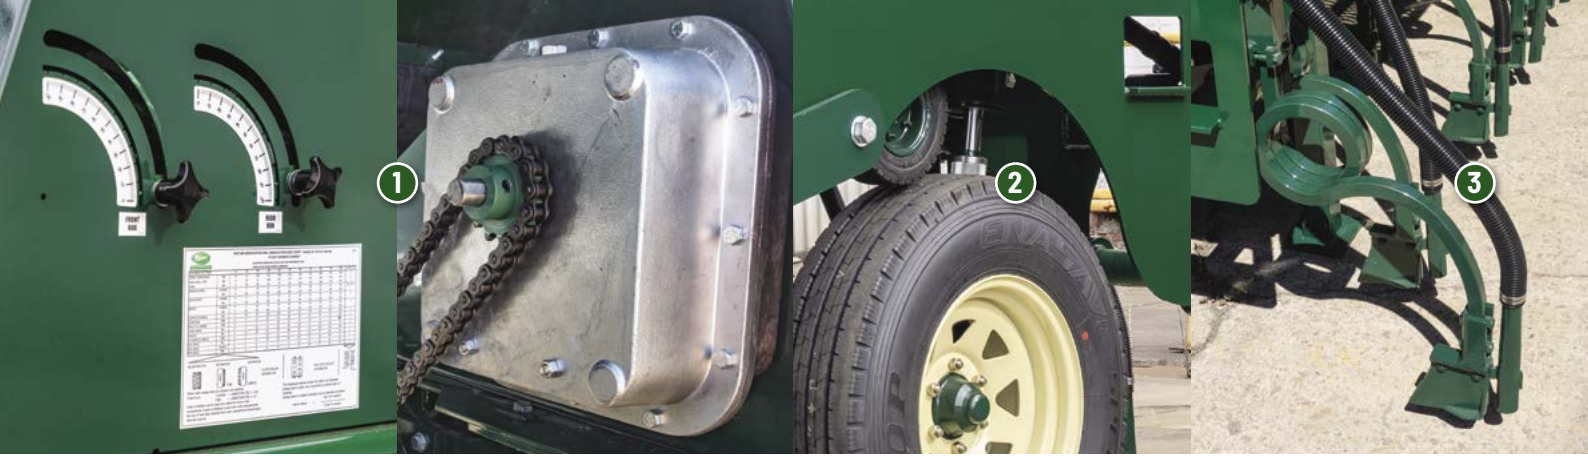

Sowing widths from 2.03m (6' 7") to 3.34m (10' 11") are available with seeding spacings of either 127mm (5") or 152mm (6"). Ideal for boosting pasture density on small to medium size holdings.

## FEATURES

### INFINITELY VARIABLE GEARBOX ①

The 9000 Series Drill is equipped with an infinitely variable speed, oil bath gearbox. Select any rate between 1 kg/ha and 240 kg/ha.

The low-maintenance traction drive makes this model ideal for tractors where electric drive would be inconvenient or impractical. Electric Drive is available as an option where appropriate.

### STANDARD COULTER BAR

The included front coulters help break up compacted soils or heavy trash, easing the way for the openers. Coulters are available in either 13-3/8" plain or 16" fluted.

### STANDARD TRAILING HITCH KIT

In tandem with the front coulters bar, the trailing hitch kit is included as standard equipment.

### EASE OF OPERATION

Gas struts on the hopper lid, remote greasing for the seed and fertilizer shaft bearings and a large platform with handrail keep things easy.

### HYDRAULIC DEPTH CONTROL ②

Precisely control the sowing depth of the machine and easily raise the tynes for transport, all at the pull of a lever.

### EVER-RELIABLE COIL TYNES ③

For simple and robust you can't go past Connor Shea Coil Tynes. With nothing to grease or go out of adjustment, coil tynes are the pinnacle of predictable performance.
